Challenges

Code/syntax problems - We plan on first spending time going back through lectures and recordings, and then googling the issue. If a solution still cannot be found, we plan on going to tutorials to ask for a TA's help

Group scheduling issues - We plan on giving ourselves as much leeway as possible when doing each section, in order to accommodate for any last minute issues that arise for any group member

Group member not doing work - This document serves a reference if there is any disagreement over how work is split, and if we cannot come to a resolution, we will go to the TAs with this document
